C-G

2,000 - 3,500 kg Capacity

LPG Counterbalance Lift Truck

Strength and Refinement

With a durable heavy-duty chassis, dependable LPG engine and refined ergonomic cabin, the Crown C-G Series LPG counterbalance forklift is ready to work hard all shift long. The C-G Series also complies with the latest EU 5 exhaust emission regulations.

Its wide range of standard and optional product features makes it an ideal choice for virtually any IC material handling environment.

The C-G Series is built to go the distance.

Outstanding Comfort and Control

Crown's C-G Series LPG counterbalance forklifts are equipped with features that can take your productivity to the next level without compromising safety, comfort or control. Enhanced comfort features reduce operator fatigue and strain, even in demanding applications.

Electronic Parking Brake
The parking brake is automatically activated when the operator stops working and gets off the forklift, helping to prevent accidents.

Ergonomic Controls
Available with manual levers.

Intuitive Instrument Panel
Easy-to-read 5-inch colour display shows operators important information. Changes to performance settings are simple and quick.

Spacious Legroom

The wide knee clearance and the covered tilt cylinders provide plenty of legroom and enable easy entry and exit.

Excellent Visibility

The overhead guard design adds strength for safety and allows for a clear upward view for operators. The low front dashboard improves sight lines for load handling operations.

- Hydraulic hoses and chains are arranged strategically, near to the mast uprights, to provide a wide-open view
- Optional large panoramic mirror assists the operator with a clear view of the rear working area
- Optional Tilt Position Assist

Premium Adjustable Seat (optional)

A full-suspension Grammer comfort seat can accommodate individual operator preferences.

High-Visibility Seat Belt

The seat belt must be fastened when the operator is seated in order to operate the forklift.

Operator Sensing System

An operator must be seated for the forklift to function.

Modular Cabins (optional)

Four individually adaptable cabin layouts are available for protection in different conditions

- Roof only
- Roof and front windshield
- Roof, front windshield and rear window
- Hard cabin, also available with heat and air conditioning

Floor Spotlights (optional)

Crown's Proven Service and Support

Crown support begins long before the lift truck leaves the factory. Our integrated approach to service provides an exceptional user experience to our customers – before, during and after the sale.

Virtually Maintenance-Free Oil-Cooled Disc Brakes

Fully enclosed, oil-cooled dual disc brake assemblies prevent contamination for exceptional stopping power and long life. The virtually maintenance-free discs are submerged in oil, keeping them cool and limiting wear.

Dual Element Air Cleaner

A heavy-duty dual element air cleaner provides advanced protection against engine contamination. The elements are easily accessible through a clip-on cover.

2.4 Litre Industrial Engine

This engine includes a silent timing chain that aids in the reduction of noise levels and helps to improve efficiency. An aluminium cylinder block and oil pan also help to reduce noise. Additionally, fuel efficiency is increased thanks to the use of abrasion-resistant materials and specially designed 'beehive type' valve springs.

Enhanced Cooling System

The combination of a large capacity radiator and the special counterweight design optimises airflow to improve cooling capabilities and increases uptime in heavy-duty applications.

Easy to Access Components

Toolless panel removal and generous hood opening allow for quick checks and easy access to serviceable components.

Easy Diagnostics

The forklift's condition can be diagnosed with just a cable and a laptop, allowing the service technician to maintain your forklift as quickly as possible.
